

Aircraft Production in World War II: 1939 - 1945

Chart: C.14

Great Britain (Mainly used in Europe until 1945)  
 United States: (US aircraft output split between Europe and the Pacific 70/30 until 1943)  
 Japan (Output was roughly split between Army and Navy and mainland and the Pacific)  
 Germany

n.b. At the end of the war it is estimated that Japan had a stock of about 12,000 aircraft, mainly kamikaze, to be used to combat the expected US invasion of mainland Japan in November 1945
